

SULPHUR 90 **F O R T** Sulphur Bentonite

SULPHUR 90^{FORT} is sulphur rich pastille contains up to 90 % of sulphur added to Bentonite clay which swell the pastille in contact with soil moisture. This will enable an efficient uptake of the sulphur by the growing plants.

SULPHUR 90^{FORT}: slow – release pure sulphur can be used as a source of plant nutrient or soil amendment in alkaline and salty soils.

SULPHUR 90^{FORT}: unique type of degradable elemental sulphur enables efficient uptake of the sulphur by the growing plants.

SULPHUR 90^{FORT}: promotes plant growth, increases the yield and improves the quality of the crops.

SULPHUR 90^{FORT}: has very low dust content and therefore complies with the environmental standards.

SULPHUR 90^{FORT}: can be blended with other fertilizer such as NPKs

SULPHUR 90^{FORT}: contains high percentage of Sulphur which plays an important role in many plant processes such as the formation of protein, oils, chlorophyll, enzymes, hormones, and vitamins.

SULPHUR 90^{FORT}: suitable for all crops including cereals, vegetables, turf, shrubs, trees and field crops.

SULPHUR 90^{FORT}: consistently sized, free flowing and easy to handle, store and apply.

CHEMICAL PROPERTIES (%):

Sulphur (S).....	90%
Bentonite (N)	10%

APPLICATION RATE:

Field crops	:	30 – 60 kg/Ha.
Vegetables	:	50 – 100 kg/Ha.
Tress	:	1 – 2 kg/tree
Cereals and corn	:	30 – 50 kg/Ha.
Lawn	:	20 – 40 kg/Ha.

WARNING:

- Store away from direct sunlight in dry and well ventilated area.
- Keep away from pools, ponds and potable water.
- Use suitable spreader to avoid the damage of coating layer.

* Dosage is varying depending on purpose of use, deficiency status of the soil & sulphate requirement of the target crop.
